# HISTORIC VEHICLES IN MINIATURE

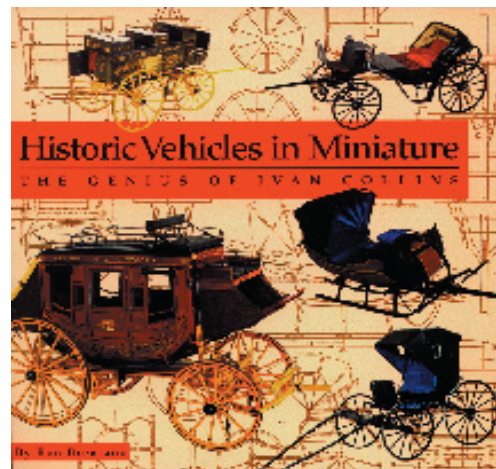

The Genius of Ivan Collins

BY RON BRENTANO

Ivan Collins, an Oregon genius, researched, planned, and built sixty-two of the most accurate, meticulously crafted, and beautiful model horse-drawn vehicles to be found anywhere. Collins focused his considerable artistry on 1/8-scale models of vehicles that helped people settle the western United States. Collins's Brougham, Concord coach, Albany sleigh, phaeton, omnibus, Victoria, medicine wagon, and other models have enchanted visitors to the exhibit of his models at the Oregon Historical Society in Portland for over three decades. This book is a catalog of Collins's work, with photographs of each model, model dimensions, and brief information about the model and the historic vehicle it represents. It also includes an overview of Collins's life and work and sample details of several of his plans, copies of which can also be purchased from the Oregon Historical Society Press.

Ron Brentano was the curator of technology and field representative at the Oregon Historical Society.
