With the cancellation of public gatherings for the coming months, many local caterers and restaurants are offering meal delivery services as a way to help those who are most vulnerable in our community who are unable to leave their homes as well as find ways to continue to support their hardworking staff. Meal delivery is an excellent way to support local businesses and is a great option for families now trying to balance distance learning and childcare with remote work. We invite you to consider supporting one of our wonderful catering partners through their delicious offerings until we are all able to come together in celebration again.
